

TITLE

HIGHLY-RESILIENT THERMOPLASTIC ELASTOMER COMPOSITIONS

ABSTRACT OF THE DISCLOSURE

A thermoplastic composition of (a) an acid copolymer, (b) a
5 salt of a high molecular weight, monomeric organic acid; (c) a
thermoplastic polymer selected from copolyetheresters, elastomeric
polyolefins, styrene diene block copolymers, elastomeric polyolefins
, thermoplastic polyurethanes and copolyetheramides; (d) cation source;
and (d) optionally a filler. Also included is use of such compositions in
10 components of one-, two- and three-piece golf balls or multi-layered golf
balls made therefrom.
